**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to a catheter with a plurality of exit holes.

Group II, claim(s) 13-16, drawn to a catheter having a porous membrane.

Group III, claim(s) 17, drawn to a method of introducing fluid through an open end of a tubular member.

Group IV, claim(s) 18-28, drawn to a catheter having a support.

Group V, claim(s) 29, drawn to a method of introducing fluid through a membrane.

Group VI, claim(s) 30-38, drawn to a method of manufacturing a catheter having a support.

Group VII, claim(s) 39-45, drawn to a catheter having a porous membrane within a tube with a plurality of exit holes.

Group VIII, claim(s) 46, drawn to a method of passing fluid through a membrane and exit holes.

Group IX, claim(s) 47-53, drawn to a method of manufacturing a catheter with a membrane and exit holes.

Group X, claim(s) 54-56, drawn to a catheter having exit holes of varying size.

Group XI, claim(s) 57, drawn to a method of delivering fluid through exit holes of varying size.

Group XII, claim(s) 58-59, drawn to a method of manufacturing a catheter having exit holes of varying size.

Group XIII, claim(s) 60-62, drawn to a catheter having a coil spring.

Art Unit: 3763

Group XIV, claim(s) 63, drawn to a method of delivering fluid through a coil spring.

Group XV, claim(s) 64, drawn to a method of manufacturing a catheter with a coil spring.

Group XVI, claim(s) 65-68, drawn to a catheter having a coil spring and exit holes.

Group XVII, claim(s) 69, drawn to a method of introducing fluid radially through coils and exit holes.

Group XVIII, claim(s) 70, drawn to a method of manufacturing a catheter having a coiled spring and exit holes.

Group XIX, claim(s) 71-72, drawn to a catheter having a flow-restricting orifice.

2. The inventions listed as Groups I-XIX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Each group has a special technical feature described above that is not described in the other groups.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
